[www.californiasolarstatistics.ca.gov](http://www.californiasolarstatistics.ca.gov) will be retiring on Friday May 29, 2020. Please update your bookmarks and references accordingly. All data and information will be archived and available on California DG Stats.

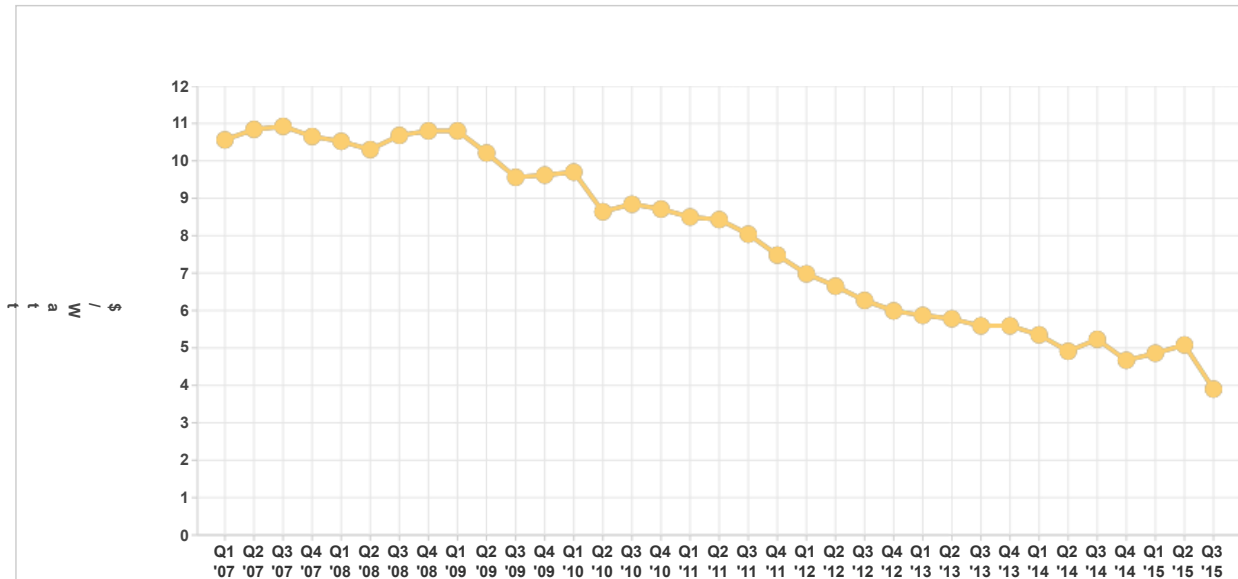

## Cost by Quarter

This figure shows the trend of average completed system costs over the life of the California Solar Initiative. Two sets of filters are available to allow for comparison between filtered data sets. Each set can be filtered by Program Year, Sector, and Program Administrator. Capacity type and inflation adjustments may also be selected with the global filters found at the top of the figure. Projects are assigned to a quarter based on the date they are Reserved. The current and previous quarter are omitted to mitigate effects due to small sample sizes.

This report is current as of May 28, 2020.

### Cost by Quarter

Global Filters ☒ CEC-AC ☐ DC (Nameplate) ☒ CPI Adjusted ☐ Non-CPI Adjusted

Series 1: 142,886 application(s) were included for the generation of this series.  
Series 2: 142,886 application(s) were included for the generation of this series.
